Removal Process:

- A soft sodium or potassium ion is used to remove hard water ions of calcium and magnesium scale, as well as the staining ions of iron and manganese

Application Benefits:

- 5 ppm removal of iron and manganese (must be in solution)
- Metered units are set to regenerate upon water consumption which offers environmental and economical use of sodium or potassium

Required Conditions:

- Total iron and manganese must be less than 5 ppm
- Iron and manganese must be in solution (clear)
- 6AB softeners are not filters. If a filter is required, refer to one of many AquaBubble™ filters
